

DELO SMALL CARTRIDGES

Quality "Made in Germany"

Premium cartridges

With the technically optimized small cartridge that we have developed specifically for various DELO adhesives, you can not only benefit from all the advantages known from commercially available small cartridges, but also from a high level of process and delivery reliability along with sustainability.

- › An optimized closure design allows the cartridge to be opened without tools
- › Standardized Luer-lock
- › Compatible with commercially available dispensing needles and compressed air adapters
- › Counterfeit protection thanks to tamper-evident seal
- › Currently available: 30 cc cartridges, additional piston variants planned

Delivery reliability

The cartridges are produced in the immediate vicinity of the DELO headquarters, which allows us to further secure our supply chain and ensure maximum delivery reliability. Cartridges cannot be discontinued at short notice, as the injection molding tools were also developed by us and are our property.

- › Short delivery times
- › High reliability

Sustainability

Our partner uses 100 % green electricity and solar energy to produce the DELO cartridges. Not only do we reduce CO₂ emissions thanks to the short delivery route, we also help our customers reduce the amount of waste by using a thin foil seal (tamper-evident closure) instead of a plastic end cap. In addition, we are conducting initial feasibility studies on the use of bio-based and recycled materials in order to be able to offer green cartridges in the future.

- › Produced with 100 % green electricity
- › CO₂ savings thanks to short delivery routes
- › Reduced waste thanks to foil seals
- › Use of bio-based / recycled materials currently being examined

Piston designs

Low-viscous media

- Firmly seated piston with sealing lip
- > Leakage-protected
- > Improved maximum emptying

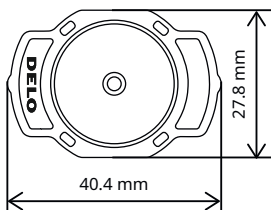

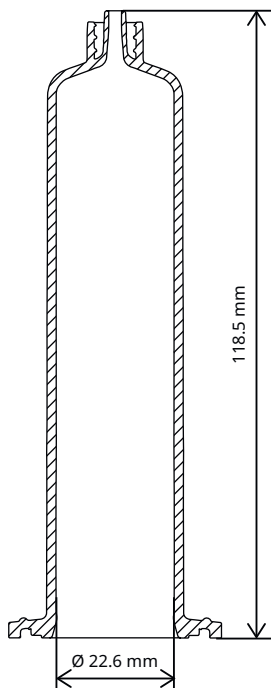

High-viscous media

- Loose-fitting piston without sealing lip
- > Prevents air from being trapped
- > High dispensing precision
