DELO DUALBOND® GE4906
UV/light and humidity-curing acrylate adhesive, low viscosity

**Base**
- modified urethane acrylate
- one-component, solvent-free

**Use**
- dualcuring adhesive for electronic applications: pin casting, pin sealing
- good adhesion to a variety of plastics
- flexible
- the cured product is normally used in a temperature range of -40 °C to +150 °C; depending on the application, other limits may be more reasonable

**Processing**
- the adhesive is supplied ready for use; in case of cool or refrigerated storage, it must be ensured that the container is conditioned to room temperature before use
- the containers are conditioned at room temperature (max. 25 °C); the conditioning time is approx. 0.5 h for containers up to 50 ml and approx. 4 h for containers up to 1,000 ml; additional heat addition is not allowed
- the adhesive is usually applied by dispensing
- the adhesive can be processed well from the original container or with DELO dispensing units
- the surfaces to be bonded must be dry as well as free of dust, grease and other contaminations
- use DELOTHEN cleaners for the cleaning of bonding surfaces
- for further information please refer to our instructions for use DELO DUALBOND and the brochure "Light Curing"

**Curing**
- with UV light or visible light in a wavelength range of 320 - 450 nm and by humidity in shadow zones
- humidity curing starts at the surface of the acrylate; a skin is formed after a few hours; deep curing of the acrylate proceeds with approx. 2mm/24h

- not suitable  + suitable  ++ especially suitable

**Curing parameters**
- dependent on material thickness and absorption, adhesive layer thickness, lamp type and distance between lamp and adhesive layer
Absorption spectrum
- photoinitiation system in acrylate matrix

Technical data

Color
- yellowish
  cured in a layer thickness of approx. 0.1 mm

Fluorescence
- yellow emitting

Density [g/cm³]
- 1.01
  at room temperature (approx. 23 °C)

Viscosity [mPas]
- 2200
  at 23 °C, rheometer, PP20, gap 500µm, shear rate 10/s

Minimal curing time [s]
- 7
  DELO Standard 23, LED intensity: 200 mW/cm², DELOLUXcontrol

Curable layer thickness [mm]
- >4
  DELO Standard 20
  curing lamp DELOLUX 20, 400 nm intensity: 200 mW/cm² DELOLUXcontrol
  duration of exposure: 60 s

Compression shear strength glass/PA [MPa]
- 2
  DELO Standard 5
  LED 400nm, intensity: 200mw/ cm², DELOLUXcontrol, irradiation time: 60s
  72h at 23 °C/50% relative humidity

Compression shear strength glass/PBT [MPa]
- 1
  DELO Standard 5
  LED 400nm, intensity: 200mw/ cm², DELOLUXcontrol, irradiation time: 60s
  72h at 23 °C/50% relative humidity

Compression shear strength glass/stainless steel [MPa]
- 2
  DELO Standard 5
  LED 400nm, intensity: 200mw/ cm², DELOLUXcontrol, irradiation time: 60s
  72h at 23 °C/50% relative humidity

Elongation at tear [%]
- 500
  according to DIN EN ISO 527

Young's modulus [MPa]
- <100
  according to DIN EN ISO 527

Tensile strength [MPa]
- 3
  according to DIN EN ISO 527

Shore hardness A
- 24
  according to DIN EN ISO 868

Glass transition temperature [°C]
- 10
  DELO Standard 24
Coefficient of linear expansion [ppm/K] 225
DELO Standard 26
TMA
in a temperature range of +40 °C to +60 °C

Dielectric constant 2.8
according to DIN 53483-2:1970-03
measured value at 1 MHz

Volume shrinkage [%] 5.6
DELO Standard 13

Water absorption [weight %] 1.1
according to DIN EN ISO 62

Processing time 4 weeks
at room temperature (max. 25 °C)

Storage life 6 months
at 0 °C to +10 °C in unopened original container

**Instructions and advice**

**General**
The data and information provided are based on tests performed under laboratory conditions. Reliable information about the behavior of the product under practical conditions and its suitability for a specific purpose cannot be concluded from this. It is the customer's responsibility to test the suitability of a product for the intended purpose by considering all specific requirements and by applying standards the customer deems suitable (e.g. DIN 2304-1). Type, physical and chemical properties of the materials to be processed with the product, as well as all actual influences occurring during transport, storage, processing and use, may cause deviations in the behavior of the product compared to its behavior under laboratory conditions. All data provided are typical average values or uniquely determined parameters measured under laboratory conditions. The data and information provided are therefore no guarantee for specific product properties or the suitability of the product for a specific purpose.
Nothing contained herein shall be construed to indicate the non-existence of any relevant patents or to constitute a permission, encouragement or recommendation to practice any development covered by any patents, without permission of the owner of this patent.

All products provided by DELO are subject to DELO’s General Terms of Business. Verbal ancillary agreements are deemed not to exist.

**Instructions for use**
The instructions for use of DELO DUALBOND are available on: www.DELO.de. We will be pleased to send them to you on demand.

**Occupational health and safety**
see material safety data sheet

**Specification**
The properties in italics are part of the specification. Ranges with clear limits are defined for them and others, where applicable. In the course of the QA test, each batch is tested for these properties and the maintenance of the limits is ensured. The measuring methods used can deviate from those specified in the data sheet. Details can be found in the QA test report.
