DELO® PHOTOBOND® AD491
UV- and light curing acrylate adhesive, high viscosity

**Base**
- modified urethane acrylate
- one-component, solvent-free

**Use**
- multi-purpose for interior plastic/plastic, glass/plastic and glass/glass bondings, e. g., bonding of glass into plastic frames or clips to glass
- combined light and UV curing also enables the curing of components which are difficult to transmit
- generally, the product is used in a temperature range of -40 °C up to +120 °C; related to the application, other limits may be more reasonable
- compliant with RoHS directive 2015/863/EU

**Processing**
- the adhesive is supplied ready for use
- the adhesive can be applied by dispensing
- the surfaces to be bonded must be dry as well as free of dust, grease and other contaminations
- dispensing valves and product-bearing elements must be carefully cleaned before use, residues of other products must be completely removed; isopropanol is recommended to remove DELO PHOTOBOND residues
- for further information please refer to our instructions for use DELO PHOTOBOND and the brochure “Light Curing”

**Curing**
- with UV light or visible light in a wavelength range of 320 - 420 nm

**Curing parameters**

- dependent on material thickness and absorption, adhesive layer thickness, lamp type and distance between lamp and adhesive layer

**Technical data**

**Color**
cured in a layer thickness of approx. 0.1 mm
colorless translucent

Density [g/cm³]
at room temperature (approx. 23 °C)
1.1

Viscosity [mPas]
at 23 °C, Brookfield spindle/rpm 7/5
90000

Minimal curing time [s]
DELO Standard 23, UVA intensity: 60 mW/cm², DELOLUXcontrol
7

Minimal curing time [s]
DELO Standard 23, LED 400nm, intensity: 200 mW/cm², DELOLUXcontrol
3

Surface
tacky

Compression shear strength glass/glass [MPa]
DELO Standard 5
UVA intensity: 55 - 60 mW/cm², DELOLUXcontrol, irradiation time: 60 s
25

Compression shear strength glass/Al [MPa]
DELO Standard 5
UVA intensity: 55 - 60 mW/cm², DELOLUXcontrol, irradiation time: 60 s

UVA intensity: 55 - 60 mW/cm², DELOLUXcontrol, irradiation time: 60 s

Tensile strength [MPa] 20
according to DIN EN ISO 527

Elongation at tear [%] 150
according to DIN EN ISO 527

Young's modulus [MPa] 400
according to DIN EN ISO 527

Shore hardness D 63
according to DIN EN ISO 868

Glass transition temperature [°C] 100
rheometer

Coefficient of linear expansion [ppm/K] 180
in a temperature range of +30 to +130 °C

Shrinkage [vol. %] 7.5
DELO Standard 13

Water absorption [weight %] 1.0
according to DIN EN ISO 62, 24 h at room temperature (approx. 23 °C)

Storage life 6 months
at room temperature (+18 °C to +25 °C) in unopened original container

Instructions and advice

General
The data and information provided are based on tests performed under laboratory conditions. Reliable information about the behavior of the product under practical conditions and its suitability for a specific purpose cannot be concluded from this. It is the customer's responsibility to test the suitability of a product for the intended purpose by considering all specific requirements and by applying standards the customer deems suitable (e.g. DIN 2304-1). Type, physical and chemical properties of the materials to be processed with the product, as well as all actual influences occurring during transport, storage, processing and use, may cause deviations in the behavior of the product compared to its behavior under laboratory conditions. All data provided are typical average values or uniquely determined parameters measured under laboratory conditions. The data and information provided are therefore no guarantee for specific product properties or the suitability of the product for a specific purpose.

Nothing contained herein shall be construed to indicate the non-existence of any relevant patents or to constitute a permission, encouragement or recommendation to practice any development covered by any patents, without permission of the owner of this patent.

All products provided by DELO are subject to DELO's General Terms of Business. Verbal ancillary agreements are deemed not to exist.

Instructions for use

The instructions for use of DELO PHOTOBOND are available on: www.DELO.de. We will be pleased to send them to you on demand.

Specification

The properties in italics are part of the specification. Ranges with clear limits are defined for them and others, where applicable. In the course of the QA test, each batch is tested for these properties and the maintenance of the limits is ensured. The measuring methods used can deviate from those specified in the data sheet. Details can be found in the QA test report.
