DELO-DUOPOX® AB8162
Multi-purpose 2C epoxy resin, cures at room temperature, initial strength is reached very fast

**Base**
- epoxy resin
- two-component, thixotropic

**Use**
- high-strength construction adhesive
- multi-purpose
- the product was developed for the use in the aircraft interior sector
- optimized for accelerated curing (e.g. at +60 °C)
- flame-retardant (standalone): meets the requirements of the FST test according to
  - a) CS/FAR Part 25 §25.853(a)(1)(ii) Amdt. 15/Amdt.25-116 & ABD0031
  - (Resistance of Material to Flame, 12s Vertical Bunsen Burner Test);
  - b) CS/FAR Part 25 §25.853(d) Amdt. 15/Amdt. 25-116 & ABD0031 (Specific Optical Density of Smoke);
  - c) ABD0031 (Toxic Components on Combustion Products)
- compliant with RoHS directive 2015/863/EU

**Processing**
- supplied ready for use and can be processed well from the original container
- components A and B must be mixed homogeneously in the mixing ratio stated below
- using the DELO-AUTOMIX system for processing is especially advantageous
- the surfaces to be bonded must be dry as well as free of dust, grease and other contaminations
- use DELOTHEN cleaners for the cleaning of bonding surfaces

**Curing**
- proceeds at room temperature (approx. 23 °C)
- increased temperatures accelerate curing
- applying heat could change physical characteristics

**Technical data**

Instructions and advice

General
The data and information provided are based on tests performed under laboratory conditions. Reliable information about the behavior of the product under practical conditions and its suitability for a specific purpose cannot be concluded from this. It is the customer's responsibility to test the suitability of a product for the intended purpose by considering all specific requirements and by applying standards the customer deems suitable (e.g. DIN 2304-1). Type, physical and chemical properties of the materials to be processed with the product, as well as all actual influences occurring during transport, storage, processing and use, may cause deviations in the behavior of the product compared to its behavior under laboratory conditions. All data provided are typical average values or uniquely determined parameters measured under laboratory conditions. The data and information provided are therefore no guarantee for specific product properties or the suitability of the product for a specific purpose. Nothing contained herein shall be construed to indicate the non-existence of any relevant patents or to constitute a permission, encouragement or recommendation to practice any development covered by any patents, without permission of the owner of this patent. All products provided by DELO are subject to DELO's General Terms of Business. Verbal ancillary agreements are deemed not to exist.

Instructions for use
The instructions for use of DELO-DUPOX are available on: www.DELO.de. We will be pleased to send them to you on demand.

Specification
The properties in italics are part of the specification. Ranges with clear limits are defined for them and others, where applicable. In the course of the QA test, each batch is tested for these properties and the maintenance of the limits is ensured. The measuring methods used can deviate from those specified in the data sheet. Details can be found in the QA test report.
