DELO-DUOPOX® CR8031
Multi-purpose 2c epoxy casting resin, cures at room temperature, low-viscous, unfilled

**Base**
- epoxy resin
- two-component

**Use**
- multi-purpose casting compound
- high temperature resistance
- the cured product is normally used in a temperature range of -40 °C to +180 °C; depending on the application, other limits may be more reasonable
- optimized for curing at elevated temperatures, e.g. at +80 °C
- compliant with RoHS directive 2015/863/EU

**Processing**
- supplied ready for use and can be processed well from the original container
- components A and B must be mixed homogeneously in the mixing ratio stated below
- using the DELO-AUTOMIX system for processing is especially advantageous
- remove mixing tube immediately at the end of work, store cartridge vertically upright with new mixing tube
- the surfaces to be bonded must be dry as well as free of dust, grease and other contaminations
- use DELOTHEN cleaners for the cleaning of bonding surfaces

**Curing**
- proceeds at room temperature (approx. 23 °C)
- increased temperatures accelerate curing
- applying heat could change physical characteristics

**Technical data**

Viscosity of component B [mPas] 11000
at 23 °C, rheometer (Paar)
shear rate 10/s

Processing time in 100 g preparation [min] 85
at room temperature (approx. 23 °C)

Maximum reaction temperature [°C] 120
in 100 g preparation at room temperature (approx. 23 °C)

Curing time until initial strength [h] 8
tensile shear strength 1 - 2 MPa
at room temperature (approx. 23 °C)

Curing time until functional strength [h] 16
tensile shear strength > 10 MPa
at room temperature (approx. 23 °C)

Curing time until functional strength [h] 0.25
tensile shear strength > 10 MPa
at +80 °C in a convection oven

Curing time until final strength [d] 7
at room temperature (approx. 23 °C)

Curing time until final strength [h] 1
at +80 °C in a convection oven

Tensile shear strength Al/Al [MPa] 16
by the criteria of DIN EN 1465, sand-blasted
component thickness 1.6 mm, gap 0.1 mm
curing: 7 d at room temperature (approx. 23 °C)
based on initial value at room temperature
measured at room temperature (approx. 23 °C)

Tensile shear strength Al/Al [MPa] 28
by the criteria of DIN EN 1465,
component thickness 1.6 mm, gap 0.1 mm
curing: 1 h at 80 °C
based on initial value at 1h +80 °C curing
measured at room temperature (approx. 23 °C)
Tensile strength [MPa]  
According to standard DIN EN ISO 527  
Curing: 7 d room temperature (approx. 23 °C)  

40

Elongation at tear [%]  
According to standard DIN EN ISO 527  
Curing: 7 d room temperature (approx. 23 °C)  

5

Young's modulus [MPa]  
According to standard DIN EN ISO 527  
Curing: 7 d room temperature (approx. 23 °C)  

1700

Tensile strength [MPa]  
According to standard DIN EN ISO 527  
Curing: 1 h at 80 °C + 24 h at room temperature (approx. 23 °C)  

48

Elongation at tear [%]  
According to standard DIN EN ISO 527  
Curing: 1 h at 80 °C + 24 h at room temperature (approx. 23 °C)  

3

Young's modulus [MPa]  
According to standard DIN EN ISO 527  
Curing: 1 h at 80 °C + 24 h at room temperature (approx. 23 °C)  

2100

Shore hardness D  
according to DIN EN ISO 868  
curing: 7 d room temperature (approx. 23 °C)

in a temperature range of +80 °C to +160 °C  

200

Volume shrinkage [vol. %]  
curing: 7 d at room temperature  

4

Water absorption [weight %]  
According to standard DIN EN ISO 62  
Curing: 7 d room temperature (approx. 23 °C)  

0.23

Decomposition temperature [°C]  
DELO standard 36  
curing: 7 d room temperature (approx. 23 °C)  

252

Creep resistance CTI  
DIN EN 60112  

600

Dielectric constant  
RF-IV method, 1 MHz, at 25 °C +/- 3 °C  

3.2

Dielectric constant  
RF-IV method, 10 MHz, at 25 °C +/- 3 °C  

3.2

Dielectric constant  
RF-IV method, 100 MHz, at 25 °C +/- 3 °C  

3.1

Dielectric constant  
RF-IV method, 1 GHz, at 25 °C +/- 3 °C  

3.0
Storage life at room temperature (approx. 23 °C) 6 months
in unopened original container

Performance under temperature influence

**Tensile strength**
- after 500 h / 1,000 h thermal ageing
- by the criteria of DIN EN ISO 527
- layer thickness: 4 mm
curing: 7 d rt / 1 h +80 °C
measured at room temperature (approx. 23 °C)

**Elongation at tear**
- after 500 h / 1,000 h thermal ageing
- by the criteria of DIN EN ISO 527
- layer thickness: 4 mm
curing: 7 d rt / 1 h +80 °C
measured at room temperature (approx. 23 °C)

**Young’s Modulus**
- after 500 h / 1,000 h thermal ageing
- by the criteria of DIN EN ISO 527
- layer thickness: 4 mm
curing: 7 d rt / 1 h +80 °C
measured at room temperature (approx. 23 °C)
Instructions and advice

General
The data and information provided are based on tests performed under laboratory conditions. Reliable information about the behavior of the product under practical conditions and its suitability for a specific purpose cannot be concluded from this. It is the customer’s responsibility to test the suitability of a product for the intended purpose by considering all specific requirements and by applying standards the customer deems suitable (e.g. DIN 2304-1). Type, physical and chemical properties of the materials to be processed with the product, as well as all actual influences occurring during transport, storage, processing and use, may cause deviations in the behavior of the product compared to its behavior under laboratory conditions. All data provided are typical average values or uniquely determined parameters measured under laboratory conditions. The data and information provided are therefore no guarantee for specific product properties or the suitability of the product for a specific purpose.

Nothing contained herein shall be construed to indicate the non-existence of any relevant patents or to constitute a permission, encouragement or recommendation to practice any development covered by any patents, without permission of the owner of this patent.

All products provided by DELO are subject to DELO’s General Terms of Business. Verbal ancillary agreements are deemed not to exist.

Instructions for use
The instructions for use of DELO-DUOPOX are available on: www.DELO.de. We will be pleased to send them to you on demand.

Specification
The properties in italics are part of the specification. Ranges with clear limits are defined for them and others, where applicable. In the course of the QA test, each batch is tested for these properties and the maintenance of the limits is ensured. The measuring methods used can deviate from those specified in the data sheet. Details can be found in the QA test report.
