DELO-QUICK® 2002
Activator for Cyanoacrylates, DELO-CA

Base
- hydrocarbon mixture
- CFC- and CF-free

Use
- for the reliable and fast curing of DELO-CA adhesives
- suitable for all DELO-CA adhesives
- can also be used as cleaner for the surfaces to be bonded

Processing
- pretreat one of the surfaces to be bonded, preferably the more porous respectively less dense one, with the activator
- let the solvent evaporate completely
- adhesive application and joining of the components
- in special cases, both bonding surfaces can be pretreated
- in case of open bondings or in boundary areas, the activator can also be sprayed onto the adhesive subsequently
- in case of low-viscous products, dispense sparingly, otherwise overreactions (foaming of the adhesive) can be initiated
- for subsequent treatment, high-viscous DELO-CA adhesives respectively propolyester-based cyanoacrylates are best suitable
- the behavior of lacquered surfaces and thermoplastics towards DELO-QUICK 2002 should be tested where required

Instructions and advice

General
The data and information provided are based on tests performed under laboratory conditions. Reliable information about the behavior of the product under practical conditions and its suitability for a specific purpose cannot be concluded from this. It is the customer’s responsibility to test the suitability of the product for the intended purpose by considering all specific requirements. Type and physical and chemical properties of the materials to be processed with the product, as well as all actual influences occurring during transport, storage, processing and use, may cause deviations in the behavior of the product compared to its behavior under laboratory conditions. The data and information provided are therefore no guarantee for specific product properties or the suitability of the product for the intended purpose.
Nothing contained herein shall be construed to indicate the non-existence of any relevant patents or to constitute a permission, encouragement or recommendation to practice any development covered by any patents, without permission of the owner of this patent.
All products provided by DELO are subject to DELOs’ General Terms of Business. Verbal side agreements are not permitted. This document is subject to change.

Instructions for use
The instructions for use of DELO-CA are available on: www.DELO.de. We will be pleased to send them to you on demand.

Occupational health and safety

Specification
The properties in italics are part of the specification. Ranges with clear limits are defined for them and others, where applicable. In the course of the QA test, each batch is tested for these properties and the maintenance of the limits is ensured. The measuring methods used can deviate from those specified in the data sheet. Details can be found in the QA test report.
