

DELO-DRIVERBOX

Control of DELO-DOT D4

The DELO-DRIVERBOX is used to control the piezoelectric DELO-DOT D4 dispensing valve and to transmit status signals to the PLC for process control. The DELO-DRIVERBOX is available for at least 1 to 2 individual channels.

Technical data

Position for operation	Switch cabinet
Dimensions	128.4 mm x 106,3 mm x 171 mm
Power supply	24 V DC \pm 10 %
Operating temperature	Up to 150 Hz and continuous operation: +5 °C to +50 °C From 150 Hz and continuous operation: +5 °C to +40 °C
Weight	1.72 kg
Product compatibility	DELO-PROTOR 2 DELO-DOT D4
