

DELO-DRIVERBOX PN

Control of DELO-DOT PN5

The DELO-DRIVERBOX PN base unit is absolutely necessary for reliable control and power supply of DELO-DOT PN5. This allows cycle signals to be transmitted to the valve in real time and the nozzle heater integrated in the valve to be supplied with power. Control takes place either directly via a powerful PLC or optionally via the additionally available cycle generator.

Technical data

Operation of use	Switch cabinet
Dimensions	61,9 mm x 20 mm x 71 mm
Maximum power consumption	24 V DC: 100 W
Operating temperature	+15 °C to +40 °C
Interfaces	Valve DELO-DOT PN5 (output), PLC or DELO-DOT pilot (input)
Weight	73 g
Product compatibility	DELO-DOT PN5 DELO-DOT pilot 1i
