

# DELO-DUOPOX® CR8021

#### modified epoxy resin | 2C | room-temperature-curing

tension-equalizing, flowable, very good media resistance, suitable for side-by-side cartridges, unfilled

# **Special features of product**

- compliant with RoHS Directive 2015/863/EU
- Long-term preheating of components is possible
   electronic encapsulant
- Any formation of bubbles during homogenization or mixing can be significantly minimized by using a processing system with vacuum unit

#### **Function**

- encapsulant / potting compound

## Typical area of use

-40 - 140 °C

#### **Curing**

Curing time		
until initial strength at rt approx. +23 °C tensile shear strength 1 - 2 MPa	5.5	h
until functional strength at rt approx. +23 °C tensile shear strength > 10 MPa	48	h
until final strength at rt approx. +23 °C	72	h
until initial strength at +80°C tensile shear strength 1 - 2 MPa	5	min
until functional strength at +80 °C tensile shear strength > 10 MPa	15	min
Processing		
Mixing ratio A : B - volume	0.5 : 1	
Mixing ratio A : B - weight	0.58 : 1	
Processing time after mixing		
in 100 g batch at rt approx. +23 °C	60	min

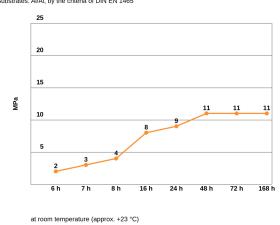

at +18 °C to +25 °C	12	month(s)
Technical properties		
Color in cured condition in 1 mm layer thickness	yellowish	
Transparency in cured condition in 1 mm layer thickness	translucent	
Parameters		
Density Component A   liquid	1.18	g/cm³
Density Component B   liquid	1.03	g/cm³
Viscosity Component A   liquid   Rheometer   Shear rate: 2 1/s   Gap: 37 μm	34000	mPa·s
Viscosity Component B   liquid   Rheometer   Shear rate: 2 1/s   Gap: 37 μm	10000	mPa∙s
Tensile shear strength by the criteria of DIN EN 1465   AI   AI   Pretreatment: sand-blasted   at approx. +23 °C   168 h	11	MPa
Tensile shear strength by the criteria of DIN EN 1465   <b>Steel</b>   <b>Steel</b>   Pretreatment: sand-blasted   at approx. +23 °C   168 h	12	MPa
Peel resistance DELO Standard 38   Steel   Steel   Pretreatment: sand-blasted   at approx. +23 °C   168 h	3	N/mm
Tensile strength by the criteria of DIN EN ISO 527   at approx. +23 °C   168 h	9	MPa
Elongation at tear by the criteria of DIN EN ISO 527   at approx. +23 °C   168 h	35	%
Young's modulus by the criteria of DIN EN ISO 527   at approx. +23 °C   168 h	100	MPa
Shore hardness D by the criteria of DIN EN ISO 868   at approx. +23 °C   168 h	47	
Glass transition temperature  DMTA   at approx. +23 °C   168 h	47	°C

	cient of linear expansion tandard 26   TMA   Evaluation T: 30 °C - 150 °C   at approx. +23 °C   168 h	250	ppm/K
Shrinka DELO St	age tandard 13   at approx. +23 °C   168 h	3	vol. %
by the ci	absorption riteria of DIN EN ISO 62   Layer thickness: 4 mm   at approx. +23 °C   168 h   Type of storage. Medium: Distilled water   Storage temperature: at approx. +23 °C   Duration: 24 h	0.5	wt. %
	nposition temperature tandard 36   at approx. +23°C   168 h	277	°C
	e resistivity riteria of DIN EN 62631-3-1   at approx. +23 °C   168 h	>1E12	Ohm·cm
	e resistance riteria of DIN EN 62631-3-2   at approx. +23 °C   168 h	>1E11	Ohm
	ve permittivity riteria of RF-IV   1 MHz	3.5	
	ve permittivity riteria of RF-IV   1 GHz	3.0	
	ve permittivity riteria of RF-IV   10 MHz	3.5	
	ve permittivity riteria of RF-IV   100 MHz	3.2	
	arative Tracking Index riteria of DIN EN 60112	600	

Tensile shear strength for determining the curing process Substrates: Al/Al, by the criteria of DIN EN 1465

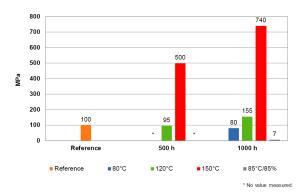

Tensile shear strength after thermal storage, by the criteria of DIN EN 1465  $\,$ 

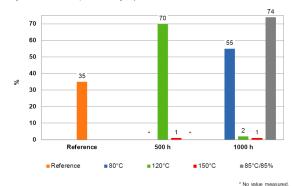

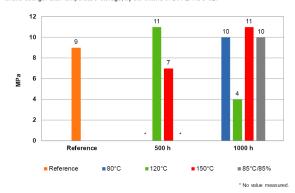

#### Elongation at tear after temperature storage, by the criteria of DIN EN ISO 527

Tensile strength after temperature storage, by the criteria of DIN EN ISO 52

## **Converting table**

°F	$= (^{\circ}C \times 1.8) + 32$	1	MPa	= 145.04 psi
1 inch	= 25.4 mm	1	GPa	= 145.04 ksi
1 mil	= 25.4 µm	1	сР	= 1 mPa·s
1 07	= 28 3495 g	1	Ν	= 0.225 lb

## General curing and processing information

The curing time stated in the technical data was determined in the laboratory. It can vary depending on the adhesive quantity and component geometry and is therefore a reference value. Curing can be supported or accelerated by heat input. Additional heat input can change the physical properties of the product. Values measured after 24 h at approx. 23  $^{\circ}$ C / 50  $^{\circ}$ r.h., unless otherwise specified.

#### General

The data and information provided are based on tests performed under laboratory conditions. Reliable information about the behavior of the product under practical conditions and its suitability for a specific purpose cannot be concluded from this. It is the customer's responsibility to test the suitability of a product

for the intended purpose by considering all specific requirements and by applying standards the customer deems suitable (e. g. DIN 2304-1). Type, physical and chemical properties of the materials to be processed with the product, as well as all actual influences occurring during transport, storage, processing and use, may cause deviations in the behavior of the product compared to its behavior under laboratory conditions. All data provided are typical average values or uniquely determined parameters measured under laboratory conditions. The data and information provided are therefore no guarantee for specific product properties or the suitability of the product for a specific purpose.

Nothing contained herein shall be construed to indicate the non-existence of any relevant patents or to constitute a permission, encouragement or recommendation to practice any development covered by any patents, without permission of the owner of this patent.

All products provided by DELO are subject to DELO's General Terms of Business. Verbal ancillary agreements are deemed not to exist.

#### Instructions for use

You can find further details in the instructions for use.

The instructions for use are available on www.DELO-adhesives.com.

We will be pleased to send them to you on demand.

#### Occupational health and safety

See material safety data sheet.

# **Specification**

Nothing contained in this Technical Datasheet shall be interpreted as any express warranty or guarantee. This Technical Datasheet is for reference only and does not constitute a product specification. Please ask our responsible Sales Engineer for the applicable product specification which includes defined ranges. DELO is neither liable for any values and content of this Technical Datasheet nor for oral or written recommendations regarding the use, unless otherwise agreed in writing. This limitation of liability is not applicable for damages resulting from intent, gross negligence or culpable breach of cardinal obligations, nor shall it apply in case of death or personal injury or in case of liability under any applicable compulsory law.
